. Steel set up by the Planning Commission bad earlier estimated the demand and availability of finishe'd steel during the Seventh Plan period as follows:

(Million tonnes)

Year	Estimated Demand	Estimated Availabi-lity	Gap (—) Surplus (+)
1985-86	11.35	9.92	(—) 1.43
1986-87	11.93	10.72	(—) 1.21
1987-88	12.53	11.18	(—) 1.35
1988-89	13.17	12.28	(—) 0.89
1989-90	13.86	13.02	(—) 0.84

The demand and availability of steel was reassessed in 1986 afte$_r$ taking into account the investment pattern incorporated in the' Seventh Plan over the plans for the modernisation and expansion of the indigenous steel producing units.

The estimates of Demand and Availability as per this reassessment for the terminal year of the 7th plan is as follows: —

(Million tonnes)

	Noo-flat Products	Flat Product'
Demand	81	6. 0
Availability.	91	6. 2
GAP.	(I-) 1 0	(+) 02

Taking intp account itemwise deman'd and availability there is, however, likely to be a deficit in certain types of flat products.

(c) To meet the gaps in respect of such products, imports will be allowed.
